NEUCE **NEUCETHERM PRIMER - Background Regulator** Code: 1234 O FUTURO DA TINTA **SECTION 5 : FIRE-FIGHTING MEASURES** 5.1 EXTINGUISHING MEDIA: # Extinguishing powder or CO2. In the case of more important fires, also alcohol resistant foam and water spray/mist. SPECIAL HAZARDS ARISING FROM THE SUBSTANCE OR MIXTURE: 5.2 # As consequence of combustion or thermal decomposition, hazardous products may be produced: carbon monoxide, carbon dioxide, nitrogen oxides. Exposure to combustion or decomposition products may be a hazard to health. 5.3 ADVICE FOR FIREFIGHTERS: # Depending on magnitude of fire, heat-proof protective clothing may be required, appropriate independent breathing Special protective equipment: apparatus, gloves, protective glasses or face masks and boots. If the fire-proof protective equipment is not available or is not being used, combat fire from a sheltered position or from a safe distance. The standard EN469 provides a basic level of protection for chemical incidents. Other recommendations: # Cool with water the tanks, cisterns or containers close to sources of heat or fire. Bear in mind the direction of the wind. Do not allow fire-fighting residue to enter drains, sewers or water courses. **SECTION 6 : ACCIDENTAL RELEASE MEASURES** PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES 6.1 # Eliminate possible sources of ignition and when appropriate, ventilate the area. Do not smoke. Avoid direct contact with this product. 6.2 ENVIRONMENTAL PRECAUTIONS: # Avoid contamination of drains, surface or subterranean water and soil. In the case of large scale spills or when the product contaminates lakes, rivers or sewages, inform the appropriate authorities in accordance with local regulations. 6.3 METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP: # Contain and mop up spills with absorbent materials (sawdust, earth, sand, vermiculite, diatomaceous earth, etc..). Avoid use of solvents. Keep the remains in a closed container. 6.4 REFERENCE TO OTHER SECTIONS For contact information in case of emergency, see section 1. For information on safe handling, see section 7. For exposure controls and personal protection measures, see section 8. For waste disposal, follow the recommendations in section 13. **SECTION 7 : HANDLING AND STORAGE** PRECAUTIONS FOR SAFE HANDLING: 7.1 # Comply with the existing legislation on health and safety at work. General recommendations # Avoid any type of leakage or escape. Keep the container tightly closed. Recommend tions for the prevention of fire and explosion risks # Although due its low flammability does not represent a serious risk of fire, all type of measures should be taken in order to avoid any possibility of ignition. Flash point 450* e °C 1.7* - 10.0 Upper/lower flammability or explosive limits % Volume 25°C Recommendations for the prevention of toxicological risks: # Do not eat, drink or smoke in application and drying areas. After handling, wash hands with soap and water. For exposure controls and personal protection measures, see section 8. commendations for the prevention of environmental contamination: # It is not considered a danger to the environment. In the case of accidental spillage, follow the instructions indicated in section 6. CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES 7.2 # Forbid the entry to unauthorized persons. Keep out of reach of children. This product should be stored isolated from heat and electrical sources. Do not smoke in storage area. If possible, avoid direct contact with sunlight. In order to avoid leakages, the containers, after use, should be closed carefully and placed in a vertical position. For more information, see section 10. # According to current legislation. Class of storage Maximum storage period # 24. months Temperature interval # min: 5. °C, max: 35. °C (recommended). Incompatible materials # Keep away from oxidixing agents, from strongly alkaline and strongly acid materials. # According to current legislation. Limit quantity (Seveso III): # Directive 2012/18/EU: Not applicable (product for non industrial use). . SPECIFIC END USES: 7.3 # For the use of this product do not exist particular recommendations apart from that already indicated.

GHS/CLP Ingestion: ATE > 2000 # Not classified as a product with acute toxicity if swallowed (based on available data, the classification criteria are not Not classified mg/kg bw 3.1.3.6. met) GHS/CLP 3.1.3.6: Classification of mixtures based on ingredients of the mixture (additivity formula). CORROSION / IRRITATION / SENSITISATION: Danger class Target organs Cat. Main effects, acute and/or delayed Criteria # Not classified as a product corrosive or irritant by inhalation GHS/CLP Respiratory corrosion/irritation (based on available data, the classification criteria are not Not classified 1.2.6. met). 3.8.3.4. Skin corrosion/irritation: # Not classified as a product corrosive or irritant in contact GHS/CLP Not classified with skin (based on available data, the classification criteria 3.2.3.3. are not met). Serious eye damage/irritation: # Not classified as a product corrosive or irritant in contact GHS/CLP Not classified with eyes (based on available data, the classification criteria 3.3.3.3. are not met). # Not classified as a product sensitising by inhalation (based GHS/CLP Respiratory sensitisation: Not classified on available data, the classification criteria are not met). 3.4.3.3. Skin sensitisation: _ # Not classified as a product sensitising by skin contact (based GHS/CLP

on available data, the classification criteria are not met).

GHS/CLP 3.2.3.3: Classification of the mixture when data are available for all components or only for some components.

GHS/CLP 3.3.3.3: Classification of the mixture when data are available for all components or only for some components.

GHS/CLP 3.4.3.3: Classification of the mixture when data are available for all components or only for some components.

ADDITIONAL INFORMATION: Not available.

Not classified
